Shambaugh's Fab Shop provide stainless steel, carbon steel, plumbing, fire protection, electrical, and controls fabrication.

A distinct advantage of the Shambaugh team is their in-house planning department and fabrication facilities.

Delivery of coordinated drawings and prefab materials aids in helping to improve the contract schedule and critical-path work activities for projects.

The controlled environment and schedule-time savings of fabrication allows them to create the assemblies and products in a more productive way, which in turn shortens the installation time in the field.
